Profile

Back-End developer with 2+ years of experience in building scalable Laravel-based applications. Passionate about software architecture, clean code, and building secure APIs. Competed in national programming contests and contributed to real-world systems including , Accounting, and Event Management platforms. I graduated from Al Wadi International Private University

Technical Skills

- Languages: PHP, C++ | Frameworks: Laravel | Databases: MySQL, MongoDB
- Tools: Git, GitHub, Postman,, REST API, JWT, Pusher, WebSockets
- Other: MVC Architecture, API Security, Multi-channel Notifications

Experience

- Microtech Company – Back-End Developer (Laravel) | 2022 – 2024
- - Developed platforms such as accounting systems, event managers, and PDF management tools.
- - Integrated features including roles/permissions, email & Telegram/WhatsApp notifications.
- - Improved system scalability, code quality, and security practices.
- Darbni – Web Development Trainee | 6-month Training
- - Acquired foundational web development skills in Laravel and Git.
- - Gained real-world development experience within a team.
- PharmaParadise – Laravel Developer | 2 Months
- - Built a drug store locator tailored for pharmacies across Syria.

- Edux Company – Back-End Developer (Laravel) | 2-month Training
- *A web platform designed to facilitate online exams between teachers and students.*
- Developed a complete web application that enables partner teachers to create and schedule exams for their students.
- Students can take exams within a specified timeframe, and the system automatically handles submissions, grading, and review.
- Teachers can manage questions, set exam parameters (duration, attempt limits, etc.), and monitor student performance.
- Implemented using **Laravel** (back end) and **React** (front end), with features such as real-time exam visibility, image attachments for questions, and secure student access.
-

Projects

- Accounting Website: Comprehensive accounting platform with advanced notifications and role-based access.
- Event Management Website: Web app for managing events with attendance tracking and notifications.
- PDF Management Website: Laravel system for generating, storing, and organizing PDF documents securely.
- PharmaParadise: Drug store location web system tailored for pharmacy usage in Syria.
- Edux: *A web platform designed to facilitate online exams between teachers and students.*

Education

- BSc in Informatics Engineering – Al-Wadi International University
- Graduation year: 2025

Certifications & Participation

- ACPC Programming Competition
- - Participated for two consecutive years and qualified among Syrian universities.

Interests

- Competitive programming on Codeforces
- Exploring emerging technologies (currently MongoDB with Laravel)
